# The Leadership Circle – verktyg för att utveckla ditt ledarskap

As a central part of the course, we use The Leadership Circle Profile, a well-established and research-based tool for leadership development. Through this 360-degree feedback, you get a unique and in-depth picture of both your strengths and your development areas. The tool makes visible how your behaviors are connected to the inner driving forces and assumptions that shape your leadership in everyday life.

Using individual feedback, we help you understand your current leadership pattern and provide a clear direction for how you can develop further. By using the Leadership Circle Profile, we create a solid foundation for the continued work of the training and enable you to adopt other tools and methods in a more accurate and sustainable way.

The creative competencies measure how we achieve results-guided by a vision and where you enable the best in your employees. The competencies also capture whether you can act with integrity and courage to change and improve what is needed for success.

Reactive tendencies capture leadership styles that prevent you from reaching your and the organization's potential by acting in a self-limiting manner for various reasons. For example, it may be about protecting your relationships, others' perception of you as smart, or capable of taking action.
